
Xpress 10

- unrivalled flexibility in modular SMD placement

P210093

Speed	10,000 cph
Component Range	0402 to 50mm ² (0201/70mm ² options)
Minimum Pitch	0.4mm (0.3mm option)
Accuracy at 3 sigma	±45µm (QFP) to ±75µm (chip)
Feeder Capacity	92 * 8mm
Tape Size Range	8 - 88mm
Feeder Types	tape, stick and tray
PCB Size Range	60 * 60mm to 500 * 460mm
PCB Thickness Range	0.5mm - 4.5mm

The Europlacer Xpress breaks the mould of contemporary modular placement machines. Unique line control software allows live feeder set-up edits across multiple machines in line. Intelligent feeders can be moved between machines and placement programmes will adapt automatically. The Xpress modules are true 'building blocks' offering chip-shooter placement rates yet retaining the flexibility of fine-pitch machines. This multi-tasking brings extensive capital and floor space savings, whilst redeployment opportunities protect your investment by extending useful life over a multitude of applications and line configurations.
